FIRE-RESISTANT STRUCTURES

ON THE MARKET
SINCE 2014
YEARS

THE LARGEST
MANUFACTURER
FIRE FIGHTING
STRUCTURES

OUR PRODUCTS PASS WITH CONFIDENCE
STATE FIRE INSPECTIONS

Production company
LLC «PSK «GOST» Group

Who are we

LLC PSK GOST Group is the largest manufacturer of fire protection structures in the country.

Starting our activity in March 2014, we have grown into a strong Russian brand with our own technologies and materials.

OUR MAIN PRODUCT

Go Glass (M1 grade glass) is a composite double-glazed windows of our production, which have high refractory qualities, representing a fire-resistant composition OF-643. We have developed our own certified technology for filling the profile with a special composition, which increases the fire resistance limit of aluminum by an order of magnitude.

THE RAW MATERIALS THAT THE LLC PSK GOST GROUP PRODUCES INDEPENDENTLY

- fire-proof glass;
- Fire-resistant gel;
- fire-resistant profile;
- fire-resistant filling for aluminum profiles.

OUR PRODUCT LINES:

- Fire-proof blind windows with a fire resistance limit of E30/60;
- Fire-fighting windows with folding, pivoting and swing-out sash with fire resistance limit E30;
- Translucent fire-fighting partitions (blind) with fire resistance conversion EIW15/30/45/60/90

- Translucent fire doors with fire resistance limit EIW30/60;
- Fire doors with opaque fire-resistant filling with fire resistance limit EI60;
- Fire-fighting smoke- and gas-proof translucent doors of the EIWS60 type

- Translucent fire-fighting partitions with a built-in door block with a fire resistance limit of EIW15/30/45/60/90;
- Translucent fire-fighting partitions with a built-in smoke- and gas-proof door block of type EIWS60;
- Fire-resistant stained glass windows with fire resistance limit EI15, E60

- Fire-resistant multilayer glass GOSTeklo (GST) with fire resistance limit E30/60, EIW15/30/45/60/90;
- Fire curtains with fire resistance limit EI60;
- Fire-resistant sandwich;
- Anti-aircraft lights against fire-products with a fire resistance limit of EI60

1

PURPOSE

Ensuring fire-resistant safety of evacuation routes at the facilities of the Russian Federation. To achieve this, we are creating a product line - fire barriers made of aluminum, steel and glass.

2

Own production area, with an area of 1800 sq. m; a team of professionals with advanced experience; uninterrupted supply. For the manufacture of our products, it is necessary the purchase of only 20% of all materials used, the remaining 80% we produce ourselves; a progressive fleet of equipment and machinery. We are closely monitoring the development of our production facilities. We are generously investing in the development of our production facilities. Our main focus is innovation and quality.

3

Our company is in the mode of continuous improvement, expansion of the product range and production capabilities. Now we are developing our areas as in the field of fire safety, as well as in the field of metalworking and building structures.
